

Mooltipass – Quality Control & Tests

1) Electrical Testing:

Please follow <https://www.youtube.com/watch?v=oeGkkiU6DZA>

2) Functional Test:

Please follow <https://www.youtube.com/watch?v=X9gxmtwLPsw>

Write device ID given by the script **on the sticker on the back of the Mooltipass**

3) Visual Inspection:

- **FAIL:** LEDs having different luminosity

Make sure that all LEDs have the same brightness during functional test

- **Air bubbles trapped under double-sided tape:**

Pierce the bubbles and push to remove any trapped air or the touch interface won't work

- **Misalignment between front panel and ABS/AL case:**

Make sure that the front panel is perfectly aligned with the ABS case

- **Glue deposits on the side of the Mooltipass:**

Make sure that during the gluing process no glue gets outside the assembly

- **Visual aspect of the Mooltipass**

Make sure there are no scratches, no deformations.
